

Hyperlinks

Hyperlinks

A hyperlink is a word, phrase, or image that you can click on to jump to a new document or a new section within the current document, or to a webpage for that matter. Hyperlinks are found in nearly all Web pages, allowing users to click their way from page to page.

In a csv file opened in Excel, when you select a cell with a hyperlinked item, first, the hyperlink will be displayed on top with the value =HYPERLINK... If you click on cell A1, the hyperlink will open the Google page.

On a Mac, if the hyperlink looks like a red warning triangle... You have opened the csv file with Mac Numbers rather than Excel. Please use Excel to open all csv files.
