

# Wordle

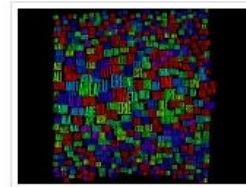

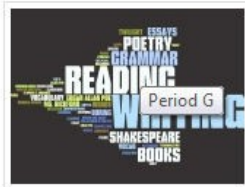

Web-based applications such as *Wordle* produce those graphs (available on the web at <http://www.wordle.net/>).

**W**ordle is a toy for generating “word clouds” from text that you provide. The clouds give greater prominence to words that appear more frequently in the source text. You can tweak your clouds with different fonts, layouts, and color schemes. The images you create with Wordle are yours to use however you like. You can print them out, or save them to the Wordle gallery to share with your friends.

## Create your own.

View some examples created by others...

When you open Wordle, click on **Create**, the second tab on top, after Home. The Wordle page will look like this:

The image shows the 'Create' page of the Wordle website. At the top is the navigation bar with the Wordle logo and links: Home, Create, Gallery, Credits, News, Forum, FAQ, and Advanced. Below the navigation bar is a large text area with the prompt 'Paste in a bunch of text:'. Below the text area is a 'Go' button. Below the 'Go' button is the word 'OR' in a large, serif font. Below 'OR' is a text input field with the prompt 'Enter the URL of any blog, blog feed, or any other web page that has an Atom or RSS feed.' Below the input field is a 'Submit' button. At the bottom of the page is a footer with the copyright notice '© 2013 Jonathan Feinberg' and a link to 'Terms of Use'. The build number 'build #1421' is also visible in the bottom right corner.

Highlight the column in the Text file where you have outputted the text strings you wish to graph and Copy (Ctrl+C) and Paste (Ctrl+V) the values into the Wordle window.
